

Installation Update

O²ctopus Aeration System installed at Pilgrim's Pride — Enterprise, AL

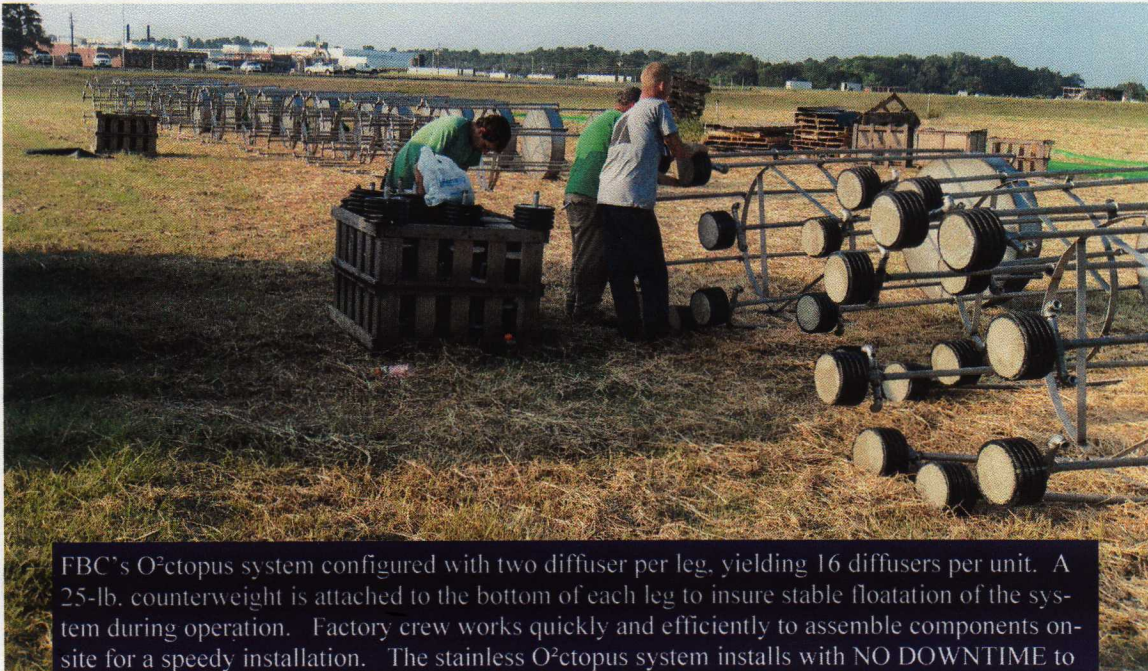

FBC Technologies has upgraded the aeration at Pilgrim's Pride processing facility in Enterprise, AL. The stainless Octopus system was installed with no downtime to operations, and reduces energy requirements at the plant from 700HP to 150HP.

The new system was installed in less than 3 days.

Better wastewater treatment - at a sharply reduced operating cost.

For more information on the Enterprise project, call FBC !

FBC's O²ctopus system configured with two diffuser per leg, yielding 16 diffusers per unit. A 25-lb. counterweight is attached to the bottom of each leg to insure stable floatation of the system during operation. Factory crew works quickly and efficiently to assemble components on-site for a speedy installation. The stainless O²ctopus system installs with NO DOWNTIME to treatment operations. Superior aeration performance at a reduced operating costs !
